

IC SPICY

IC SPICY Pitch Deck

A 12-slide narrative for partners, buyers, and strategic backers.

Use this as speaker-ready deck copy for Keynote, Pitch, Canva, or investor calls.

Farm-grown heat. Chef-built flavor. Blockchain-backed provenance.

Prepared May 2026 - Draft marketing material; legal review required before public token claims.

Slide 1 - Title

IC SPICY. Rare. Hot. Alive. Farm-grown heat, chef-built flavor, blockchain-backed provenance.

Slide 2 - The Problem

Seasoning shelves are full of anonymous commodity blends. Premium buyers want origin, craft, bold flavor, and trust. Web3 RWAs need real products people can taste and reorder.

Slide 3 - The Insight

A living plant can have a digital history as rich as a collectible. A spice jar can carry a story deeper than a label.

Slide 4 - The Product

Rare pepper plants, artisan spice blends, NIMS plant tracking, QR claims, ICRC-7 NFTs, PepperHead membership, community, recipes, and future SpicyAI.

Slide 5 - Why Now

Premium seasonings, bold heat, global flavors, clean-label products, and chef-inspired pantry upgrades are all growing. Kinder's proved challengers can take shelf share. McCormick's own flavor forecast validates chili-forward global flavor trends.

Slide 6 - Why IC SPICY Wins

Real Florida nursery operations. 30 years of Zone 10a growing experience. Chef-designed flavor. Digital provenance. ICP-native infrastructure. Community-owned energy without hiding behind crypto jargon.

Slide 7 - First SKU Line

Zone 10a Fire Salt, Reaper Reserve, Smoked Datil Citrus, and Chef's Charred Garlic Pepper. Four SKUs: one everyday, one extreme, one Florida-signature, one mass-market grill competitor.

Slide 8 - NFT and Membership Layer

8888 NFTs, 888 PepperHeads, discount tiers, whitelist access, premium AI tier, and future provenance-linked product experiences.

Slide 9 - Business Model

DTC plant sales, artisan spice sales, membership NFTs, marketplace fees, premium drops, future SPICY utility, chef collaborations, and retail distribution.

Slide 10 - Go-To-Market

Start with DTC and local proof. Build content and community. Prove sell-through in specialty retail. Approach regional grocery with velocity data. Scale only the strongest SKUs.

Slide 11 - Founder Advantage

Owner-operator credibility: luxury fine dining perspective, ACF award-winning chef input, 30 years growing experience, rare pepper genetics, and hands-on solo-builder execution.

Slide 12 - The Ask

Follow, taste, partner, stock, collect, and help turn a Florida pepper nursery into the next great premium heat brand.
