

IC SPICY

IC SPICY One-Page Executive Summary

The fastest shareable overview of the brand, product, and opportunity.

For intros, text-message followups, quick partner review, and warm investor forwards.

Farm-grown heat. Chef-built flavor. Blockchain-backed provenance.

Prepared May 2026 - Draft marketing material; legal review required before public token claims.

The One-Liner

IC SPICY is a premium rare-pepper nursery and artisan seasoning brand from Zone 10a Southwest Florida, using ICP-native provenance to connect real plants, chef-built flavor, NFTs, community, and future token utility.

Why It Matters

Seasoning shelves are full of anonymous commodity blends. IC SPICY brings origin, grower credibility, culinary craft, and digital proof to a category where premium heat, global flavor, and clean-label products are gaining momentum.

What Exists

The project has a React storefront, Motoko backend, NIMS plant inventory system, marketplace, community, CookBook, NFT infrastructure, and a mainnet NFT asset canister strategy. The brand story is anchored by 30 years of growing experience and rare pepper genetics.

The Ask

Follow, taste, partner, stock, introduce, and help turn a Florida rare-pepper nursery into a premium heat brand with grocery-shelf ambition.
