

IC SPICY

IC SPICY Strategic Partner Brief

Why IC SPICY is useful to food, retail, and ICP partners.

For DFINITY, OISY, Plug, ICPSwap, OHSHII, chefs, distributors, and regional retailers.

Farm-grown heat. Chef-built flavor. Blockchain-backed provenance.

Prepared May 2026 - Draft marketing material; legal review required before public token claims.

Partner Fit

IC SPICY is a practical RWA showcase: real products, real customers, on-chain identity, NFTs, payment rails, provenance, and a narrative normal people can understand.

ICP Ecosystem Value

The project can demonstrate certified assets, ICRC-7 NFTs, wallet signer flows, HTTPS outcalls, Internet Identity, and future ICRC-1 token utility in a consumer-facing brand.

Food Partner Value

Chefs, grocers, and distributors get a differentiated premium heat line with a Florida origin story, rare peppers, chef-designed blends, and digital storytelling that can activate shoppers at shelf.

Collaboration Ideas

Co-branded chef blends, limited NFT-backed drops, retail tasting events, provenance demos, ICP community spaces, hot-sauce or seasoning pairing kits, and regional specialty-food pilots.
