

IC SPICY

IC SPICY Wholesale Line Sheet

SKU, pricing, case, and ordering framework.

For wholesale conversations before final UPC and case-pack data is locked.

Farm-grown heat. Chef-built flavor. Blockchain-backed provenance.

Prepared May 2026 - Draft marketing material; legal review required before public token claims.

Wholesale Policy

This is a planning template. Final wholesale prices, MSRP, UPCs, net weight, case packs, minimum order quantities, payment terms, and lead times should be confirmed after packaging and COGS are finalized.

Proposed Line

Zone 10a Fire Salt: everyday finishing and grilling salt. Reaper Reserve: controlled superhot chef blend. Smoked Datil Citrus: Florida seafood and poultry blend. Chef's Charred Garlic Pepper: broad grill and roasted vegetable blend.

Suggested Structure

Target premium MSRP range: 9.99 to 14.99 depending on jar size and ingredients. Wholesale should preserve enough margin for retailer and brand after packaging, labor, spoilage, freight, demos, and trade spend.

Order Terms To Define

Case pack, opening order, reorder minimum, shelf life, storage requirements, lead time, freight policy, damaged goods policy, seasonal availability, and demo support.

Buyer Notes

Keep the first line focused. Retailers need proof of turns, not a huge catalog. Use early DTC and local sell-through to justify expansion.
