

IC SPICY

IC SPICY PepperHead Membership Guide

A clear guide to the 888 membership NFTs.

For collectors, early supporters, and Web3 community members.

Farm-grown heat. Chef-built flavor. Blockchain-backed provenance.

Prepared May 2026 - Draft marketing material; legal review required before public token claims.

What PepperHeads Are

PepperHeads are 888 membership-bearing NFTs inside the 8888-token IC SPICY collection. They are designed for early supporters who want deeper access to the brand, future drops, and premium community features.

Benefits

Future NFT drop whitelist, early access windows, product discounts by rarity, premium SpicyAI tier, community status, and access to member-first updates.

What They Are Not

They are not equity, securities, guaranteed profit instruments, or claims on treasury or nursery assets. Benefits are product and community utility.

Why 888

The limited supply makes membership legible and scarce without making it the entire brand. The physical products and community remain accessible to normal customers.

Plain-English Pitch

If you want to be early to IC SPICY as it grows from rare pepper nursery to premium heat brand, PepperHeads are the member lane.
