

IC SPICY

IC SPICY X Spaces Host Pack

A reusable host toolkit for live audio rooms.

For founder-hosted X Spaces and partner AMAs.

Farm-grown heat. Chef-built flavor. Blockchain-backed provenance.

Prepared May 2026 - Draft marketing material; legal review required before public token claims.

Opening

Welcome everyone. IC SPICY is a rare pepper nursery and premium seasoning brand from Southwest Florida, building chef-designed heat with ICP-backed provenance.

Transitions

From the farm story, move to product. From product, move to market. From market, move to ICP. From ICP, move back to how customers actually taste and buy the brand.

Guest Questions

- What makes a spice brand premium? What flavor trends are you watching? Would QR provenance matter at shelf? What would make you replace your current seasoning?

Moderation

Keep token talk compliant, stop price speculation, redirect hype into product utility, and keep the room welcoming to non-crypto food people.

Close

Follow IC SPICY, join the waitlist, share the room, and watch the build from soil to shelf.
