

IC SPICY

IC SPICY Risk Register

Market, technical, retail, legal, and founder-dependency risks.

For planning, diligence, and sober decision-making.

Farm-grown heat. Chef-built flavor. Blockchain-backed provenance.

Prepared May 2026 - Draft marketing material; legal review required before public token claims.

Technical Risks

Canister bugs, payment settlement issues, wallet signer UX, HTTPS outcall failures, cycle exhaustion, upgrade mistakes, and untested edge cases.

Market Risks

Seasoning competition, slow retail adoption, weak repeat purchase, poor SKU focus, pricing mismatch, or content failing to reach the right buyers.

Operational Risks

Solo-founder bottleneck, production capacity, packaging delays, ingredient sourcing, batch consistency, shipping, demos, and customer support.

Legal and Compliance Risks

Token regulation, food labeling, claims, privacy, sales tax, entity structure, insurance, and retail requirements.

Mitigation

Launch in stages, keep claims reviewed, prove velocity before scale, audit before funds, document operations, and maintain a clear public risk posture.
