

Dear IC SPICY Friend,

Thank you so much for following IC SPICY and helping us reach 500 followers on TikTok. To celebrate, I am excited to send you these Sugar Rush Peach seeds as a small thank-you from our farm and community.

Sugar Rush Peach is a beautiful pepper to grow, with peach-colored pods, tropical sweetness, and just enough heat to keep things interesting.

Inside your seed packet, you will find a QR code connected to your own PepperHead NFT claim.

When you scan the QR code, it will take you directly to your NFT claim page. The app will ask you to sign in. If you are new to IC SPICY, this is where you will create your Internet Identity, the secure login used by apps built on the Internet Computer.

After signing in, you can claim your PepperHead NFT and connect it to your account. Your PepperHead is more than a digital collectible: it is your on-chain connection to IC SPICY and the grower tools we are building.

Once your NFT is claimed, you can begin exploring:

- NIMS, our Nursery Inventory Management System, to track plants, growth stages, photos, notes, watering, and future harvests.
- Garden Designer to plan your growing space and experiment with layouts.
- CookBook for recipes, pepper ideas, and ways to use your harvest.
- Marketplace for future IC SPICY plants, seeds, products, and drops.
- SpicyAI for questions about peppers, growing, recipes, and the IC SPICY platform.

Our goal is to build more than a pepper brand. IC SPICY is becoming a living digital farm platform where seeds, plants, NFTs, recipes, grow data, and community all connect together. As one of our early supporters, you are helping shape that future from the ground up.

I hope these Sugar Rush Peach seeds grow into something beautiful for you. Please tag us when you plant them, post updates, or harvest your peppers. I would love to see your progress.

Thank you again for being part of the IC SPICY community.

Stay spicy,

William Beck
